DETAILED ACTION

Allowable Subject Matter

1. Claims 1 & 7 allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or suggest a holder for microtitre plate according to claim 1 wherein at least one protrusion is provided on the first panel in order to secure a gap between the wells and the recesses.

Regarding claim 7, the prior art fails to disclose or suggest a holder according to claim 7, wherein at least one baffle is provided in front of the row of wells positioned closest to the inlet for gas or liquid.

The closely related prior art to the applicant's claimed invention are Smith et al. (US 5,942,432) and Rothenberg (US 4,786,601).

Smith (US 5,942,432) discloses a holder for microtitre plate (301) or an array of separate test tubes, characterized in that it comprises a first panel (311) provided with a recess for receiving each well (located on tube array plate 301) of the microtitre plate (301) or test tubes and a second panel (319), which together with the first panel (311) and three side walls form an inner space (309), wherein the fourth side comprises an

inlet (the arrow in fig 3 shows the flow of a fluid used to heat and cool the sample wherein the inlet is located in the bottom wall) for gas or liquid, whereby the gas or liquid entering the inner space (309) via the inlet leaves the inner space (309) via said recesses (follow the arrow that indicates the flow of heating fluid and one can see that the fluid exits the device via the recesses located in 311), along the outside of the wells (located in (301)) (see fig. 3 & 4; col. 4 lines 13-5).

Rothenberg (US 4,786,601) discloses a holder for microtitre plate or an array of separate test tubes, characterized in that it comprises a first panel provided with a recess for receiving each well of the microtitre plate or test tubes and a second panel, which together with the first panel and three side walls form an inner space, wherein the fourth side comprises an inlet for gas or liquid, whereby the gas or liquid entering the inner space via the inlet leaves the inner space via said recesses (see the arrow that indicate the flow of heating fluid; one can see that the fluid exits along the outside of the wells) (see fig. 3 & 4 col. 1 lines 30 -68; col. 3 lines 39-60).

Both Smith and Rothenberg fail to disclose a holder having at least one protrusion or at least one baffle.

None of the prior art above alone or in combination discloses the at least one protrusion or the at least one baffle as is claimed by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
